Social & Financial Education

VISION

Socially and economically empowered children and young people who act as agents of change in their own lives for a more equitable and sustainable world.

MISSION

Ensuring access to quality, inclusive, child-centred social and financial education for all children and young people, especially the most vulnerable.

EMPOWERING THE NEXT GENERATION

Many children and young people around the world do not have the knowledge and skills necessary to successfully participate and contribute to their societies. Aflatoun International offers social and financial education to millions of children and young people worldwide, empowering them to make a change for a sustainable future.

WHAT WE DO

Aflatoun creates high-quality curricula, for different age groups, which are contextualised and implemented by local partners. In addition, Aflatoun develops digital learning materials, provides training for educators and strengthens the capacity of partners on Active Learning Methods, therefore boosting life skills and financial education through five core elements. The organisation also raises awareness and conducts advocacy and research to validate the impact, effectiveness and quality of its programmes.

Aflatoun integrates Digital Finance and Digital and Climate Education into its core content, preparing young people to navigate the digital world and address climate challenges for a sustainable future.

HOW WE DO IT

Aflatoun's programmes are implemented by partners worldwide through an innovative social franchise model. This dynamic, bottom-up network of interlinked partner organisations is based on reciprocal empowerment, supported by Aflatoun International. This is a high-impact, low-cost model which accelerates scale-up of Aflatoun's programmes, through integration into national curricula and increasing the number of local partners reaching vulnerable children and young people.

WHY WE DO IT

38% of children do not complete their basic education (UNESCO, 2023);

67% of young people don't understand the basics about money (S&P Global Fin Lit Survey); and

57% of young people do not have access to training opportunities, formal employment, and digital tools (World Economic Forum, 2022).

Aflatoun International wants to ensure that all children and young people have access to social and financial education, empowering them to make a positive change for a more equitable world.

Grounded in the UN Convention on the Rights of the Child and building on its strong network, Aflatoun International has an important role to play in fulfilling the SDGs. Long-lasting and sustainable solutions will only be realised if children and young people are fully equipped with the tools needed to engage with the challenges of the future.
